

**Technical Instruction Sheet**

1/2

- Properties:** AKEMI® Super Contact Spray uses environmentally-friendly propellants and does not contain any halogenated hydrocarbons as solvents. The product repels water extremely efficiently and prevents the occurrence of leakage current.
- Application areas:** AKEMI® Super Contact Spray can be safely used on all kinds of electrical and mechanical machines such as calculators, cash registers, motors, switches as well as radios and televisions. The product is particularly suitable for industrial use. It dissolves grease deposits, makes dust and dirt easier to remove and repels moisture. After the application of Super Contact Spray electrical contacts are clean and fully operational again. The product is suitable for switches, relays, contacts etc.)
- Instructions for use:**
1. Before application, test its compatibility on a small area.
  2. Spray a thin film from a distance of about 20-30 cm onto the area which is to be treated.
- Safety notices:** Please refer to the EC safety data sheet.
- Notice:** The above information is based on the latest stage of our development and application technology. Due to a multiplicity of different influencing factors, this information – as well as other oral or written technical advises – must be considered as non-binding hints. The user is obliged in each particular case to conduct performance tests, including but not limited to trials of the product, in an inconspicuous area or fabrication of a sample piece.
