

:: SWIMMING POOL CONSTRUCTION KIT

Description:

Is a set with all materials and supplies for the self-construction of a swimming pool with glass-fibre reinforced polyester. Including a starter kit with the tools.
Available in set of <40 m², <80 m² and <120 m².

Application:

As a construction system for the self-construction of a swimming pool with a glass fibre reinforced liquid swimming pool resin. This covering can be applied on concrete, screed, cement and quick building stone. In addition to strengthening and reinforcing the substrate, this covering makes the whole thing watertight.

Data on delivery:

Color:	white, cream white, light grey, dark grey, pastel blue
Viscosity:	not applicable
Mass density:	1.08 gr/cm ³
Shelf life:	6 months in closed packaging
Consistency:	depending on the product

Technical data:

Consumption:	1 kg/m ² with 300 gr glass mat
Shore:	not applicable

Processing:

In addition to the adhesive layer (primer) G4, the kit also contains the correct amount of liquid swimming pool resin, which is used in combination for 2 layers of glass mat of 300 g of 15 tex. Then coat the whole with one layer of coloured Precoat and one layer of coloured Topcoat.

Mixing ratio of the resin and Topcoat is 2-3% Mekp hardener. Always make small quantities in proportion to the potlife. Resin can be applied with a brush or a roller. Processing temperature: 18-25°C.

Tip: for more details, please ask for our extensive processing information.

Safety:

Always provide appropriate protective clothing and gloves. Avoid prolonged skin contact. Cleaning agent for tools: cleaner M (environmentally friendly substitute for acetone).

This product contains styrene and must therefore be handled in accordance with the safety regulations.
