

Technical Data Sheet

Page 1 of 1

Properties:	Spray Rusty Penetrator is a fast working rust penetrant based on mixtures of mineral oils, graphite particles, corrosion inhibitors and solvents. The product is acid-free and free of silicone.		
Application Area:	Spray Rusty Penetrator has been specially formulated of a combination of penetrating and lubricants. The product is an ideal assistant for dissolving tightly seized corroded screws, bolts and nuts. Typical applications such as - loosens exhaust nuts and manifold nuts - loosens tie roads - loosens stud bolts - loosens pulleys and shafts - lubricates and provide corrosion protection of springs, chain links, gear wheels, suspension components, locks and moving parts of machinery e.g. gardening tools, stone processing machines, etc. As containing graphite particles it is also extremely useful when used for lubricating where machinery can be left for long periods of time in weathering conditions.		
Instructions for Use:	1. Shake well before use. 2. Remove excess corrosion by using a wire brush. 3. Apply Spray Rusty Penetrator liberally and allow to penetrate for a while. 4. Loosen parts screw off or get moving		
Technical Data:	Colour:	black	
	Density:	0.728 g/cm³	
	Heat resistance:	max. 500°C	
	VOC:	643 g/l	
Storage:	30 months, cool and dry.		
Health & Safety:	Read Material Safety Data Sheet before handling or using this product.		
Sales References:	Packaging:	400 ml aerosol	
	Customs Tariff Code:	3405 3000	
	Part Number:	88559	
Important Notice:	The above information is based on the latest stage of development and application technology. Due to a multiplicity of different influencing factors, this information – as well as other oral or written technical advises – must be considered as non-binding hints. The user is obliged in each particular case to conduct performance tests, including but not limited to trails of the product, in an inconspicuous area or fabrication of a sample piece
